

USE IT

THE RIGHT WAY

Remember Me

Set your preferences with ChatGPT's **custom instructions** to get tailored answers and skip repetitive instructions. Try asking for confidence levels and source URLs for facts.

Sound Like You

To get ChatGPT to mimic your writing style, first explain your project and **provide examples of your writing**. The bot will analyze these examples to generate content in your style, streamlining future requests for articles or related content.

Self-Critique

Ask ChatGPT to **critique its own text** for improved clarity and quality. It'll analyze its previous responses and offer step-by-step feedback, which you can then use to refine the content.

Self-Prompt

Use the self-prompting feature to **generate optimized prompts** for specific tasks like writing an email. The bot will ask for details to create multiple prompt options, allowing you to pick the one that aligns best with your needs.

Make it Crisp

To get shorter answers from ChatGPT, set a **word count limit** in your settings or individual prompts. If it's still too long, ask ChatGPT to **cut the text down** by a specific percentage.

Different Output Formats

ChatGPT can produce **outputs in various formats**, like tables, CSV, HTML, JSON, or XML. You can specify the format in your prompt and then easily copy-paste the data into Excel, a text editor, or your website.
